# Qwen2.5-VL-3B-Instruct | E1 main | FP16 + FP32 recovery (mixed precision)

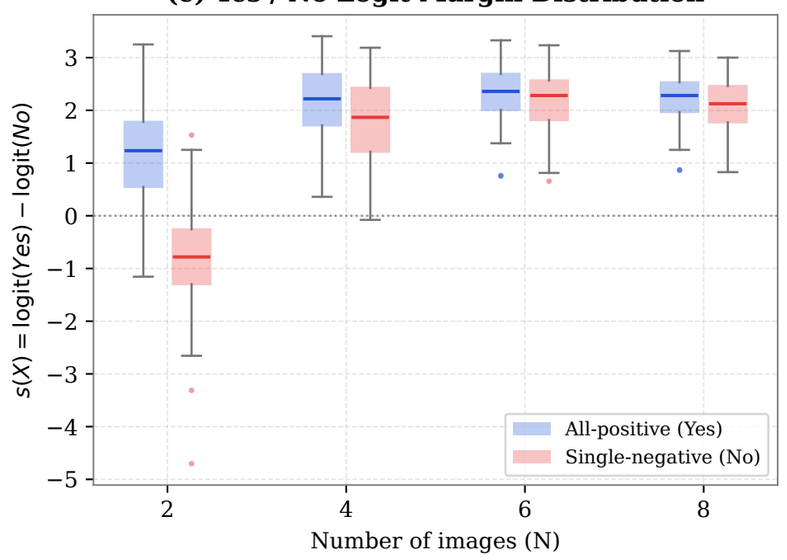

Included trials: 798/800 | Missing: 2 | float16: 790, float32: 8

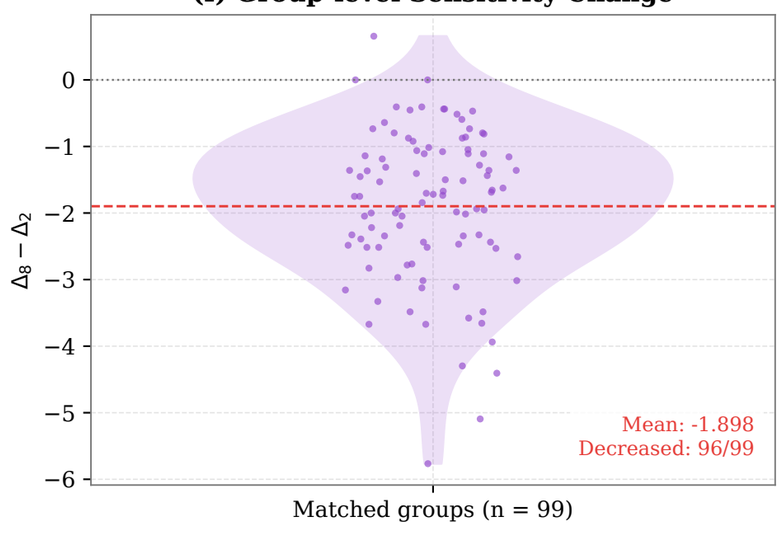

A: all-positive; B: one negative replacing image 2. Positive margin favors Yes.

(a,b,d): 95% Wilson intervals; (c): pointwise 95% group-bootstrap intervals. (c,f): same groups complete at every N.

Missing results are excluded; unparseable predictions count as incorrect accuracy, but not as explicit false-Yes/false-No. Pilot development data.
